

# CS-102 | WIRED AUDIO CONFERENCE DISCUSSION SYSTEM

## Description

The CS-102 is a simple, affordable discussion audio conferencing system. CS-102M is the control center of the whole system, including conference mode selection, external output sound reinforcement level, line input function, etc. The system can accommodate 256 microphone units, with voice input automatic gain, howling suppression, FIFO and voice-activated functions. Apply to boardrooms, business meetings, educational institutions, hotels, conference rental, system reconstruction, etc.

## Product Specification

|                     |                                                                         |
|---------------------|-------------------------------------------------------------------------|
| Main Voltage:       | AC100-240V 50/60Hz                                                      |
| Maximum Power:      | 60W                                                                     |
| Frequency Response: | 65Hz-15KHz                                                              |
| S/N:                | >85dB                                                                   |
| (T.H.D):            | <0.7%                                                                   |
| Input:              | LINE IN:0dBV(f=1KHz, THD <0.3%)                                         |
| Output:             | XLR:10dBV 6.3mm-15dBV RCA:0dBV                                          |
| Unit interface:     | Anti-drop 9P aviation plug                                              |
| RS-232 interface:   | It can be connected to central control system or video tracking system. |
| Size(mm):           | 410(W)×206 (D)×43(H)                                                    |
| Weight(g):          | Approximately 2.3Kg                                                     |
