

## TAC4 | IEM Antenna Combiner

## Description

The Relacart TAC4 antenna combiner can consolidate signals from up to four in-ear wireless monitor stereo transmitters onto a single shared antenna, effectively minimizing intermodulation distortion caused by interference between adjacent transmitters. This is crucial for multi-channel systems. It can be used with any brand of IEM set to transmit power of 100mW or lower. Additionally, it can provide DC power to up to four IEM transmitters, eliminating the need for wall-mounted power adapters.

## **Product Specification**

| Frequency range:                         | 470-940 MHz                    |
|--|--------------------------------|
| Input/output impedance:                  | 50Ω                            |
| RF gain:                                 | 0dB (±2dB)                     |
| Connector type:                          | BNC                            |
| RF signal input:                         | 4 channels                     |
| RF input normal operating range:         | +20dBm max                     |
| RF input signal LED indicator threshold: | >7dBm                          |
| Input loss:                              | <3dB                           |
| Output voltage:                          | 4 channels 12V (DC) 1A maximum |
| Power supply:                            | AC 100-240V, 50-60Hz 60W Max.  |
| Dimensions (mm):                         | 480 (W) x 350 (D) x 43 (H)     |
